

Thermostat

Posted by MyZafira - 11 Aug 2016 23:10

Need to replace my thermostat ...it is different with 1.8 ... for temporary solution I took out the thermostat and make the flow directly to the system... it is ok also only the fan is not control by the opening or closing of thermostat when the temperature hit 95 degree Celsius so far still ok... still wait the replacement for my thermostat...will post the picture later....
